Baker Hughes: International rig count climbs 12 units in March

HOUSTON, Apr. 5
04/05/2019
By O&G editors

The international rig count for March reached 1,039, up 12 units from 1,027 in February and up 67 units from 972 in March 2018, according to Baker Hughes data (OGJ Online, Apr. 6, 2018; Mar. 7, 2019).

The international offshore rig count for March was 247, down 3 units from 250 in February and up 62 from 185 in March 2018.

The worldwide rig count for March was 2,213, down 93 units from 2,306 in February and up 34 units from 2,179 in March 2018.

The average US rig count for March was 1,023, down 26 units from 1,049 in February and up 34 units from 989 in March 2018.

Europe is up 1 unit with 95 in March and up 6 units year-over-year.

Latin America is up 6 units from the previous month at 188 and down 5 units year-over-year.

The Asia-Pacific region is down 6 units to 234 and up 30 units from its year-ago average.

The Middle East is down 3 units month-over-month to 395 and down 2 units year-over-year.

The average Canadian rig count for March was 151, down 79 from 230 in February and down 67 from 218 in March 2018.

The Business Case for a Connected Worker Strategy
When Tue, Apr 23, 2019
You are likely reading this email on your smartphone, between following directions to a new restaurant and sending a picture to a group chat. With a couple taps on a screen, smartphones provide instant access to data from anywhere in the world, real-time collaboration and communication, and a million other benefits that make our lives easier. This is the world we live in 2019, outside of work. However, in the process industry, these luxuries disappear for our front-line workers as soon as they clock in for the day. Processes and workflows have not evolved in 10 to 20 years, and they completely ignore the technological advances we enjoy in our everyday lives. It's like telling accountants they can use a calculator at home, but they have to count on their fingers at work! Connected Workers are front-line employees who utilize modern technologies (mobility, sensors, wearables) to help make their jobs easier, safer and more efficient. Join Patrick Harrigan and Jaclyn Arnold from Hexagon PPM as they share their passion for empowering workers by implementing a Connected Worker Strategy.

Putting digital modernization to work: Operationalize new technology
When Tue, Apr 16, 2019
A plethora of new tools, digital technologies, and supporting network infrastructure are empowering oil and gas organizations with new capabilities never available before. Join our upcoming live webinar, sponsored by Infor, as we discuss tools to perform condition assessments in the field and reporting solutions to help you plan for the future, outside of the normal elements of standardization, costing and safety. We'll cover ways to adapt to changing technology, including culture changes, and how to reliably move into a portfolio of new technology. Our expert guest speakers will cover asset investments, safety and RCM, which drives compliance in standards like ISO-55000 and ISO-14224.

US Energy Politics in 2019
Fri, Mar 22, 2019
Two veteran Oil & Gas Journal journalists will discuss laws, regulations, and policies proposed in an intensely political year—and answer questions from webcast participants. A starting point will be the US Political Outlook special report, written by Washington Editor Nick Snow, in the Feb. 4, 2019, issue of OGJ.

Where's the Value in the Chain – Why 2019 is a Critical Year for Oil and Gas Markets
Thu, Feb 28, 2019
Join this live webinar to gain an in-depth understanding of the opportunities, risks and most pressing trends facing midstream oil and gas companies. From production outlooks to constraints to basin shifts—East Daley will navigate the energy value chain and uncover the competitive landscape. East Daley is the leading authority on asset-level analysis; by leveraging a patent-pending methodology, they connect fundamental research to financial impact across the midstream sector. This webinar will lay-out key conclusions from the company's latest annual report, "Dirty Little Secrets", which exposes the link between production (oil, gas and NGLs), infrastructure build-outs, and demand/financial value creation across the energy sector.
