ATR value of company was 0.60. The average true vary (ATR) could be a technical Analysis indicator that measures volatility by rotten the complete vary of a plus worth for that amount. Truth vary indicator is that the greatest of the following: current high less this low, absolutely the worth of this high less the previous shut and also the definite quantity of this low less the previous shut. The common true vary could be a moving average, typically fourteen days, of truth ranges. It is a "New Ideas in Technical commerce Systems."

To review the EC previous performance, look at its past history, which highlighted below: During last 5 trades the stock fixed almost -0.90%. During last 30 days it showed the change of -9.64%. During last 3 month it remained at 12.18%. During last 1 year it moved at -6.43%. Along with these its (YTD) year to date performance is standing at 31.05%.

In Colombia Industry, **Ecopetrol S.A. (EC)** have 1.98 billion outstanding shares currently held by all its shareholders, including share blocks held by institutional investors and restricted shares owned by the company's officers and insiders. The company have shares float of 223.54 million. Float is the number of shares available for trading of a particular stock. Floating stock is calculated by subtracting closely-held shares and restricted stock from a firm's total outstanding shares. Closely-held shares are those owned by insiders, major shareholders and employees, while restricted stock refers to insider shares that cannot be traded because of a temporary restriction such as the lock-up period after an initial public offering. A stock with a small float will generally be more volatile than a stock with a large float, apart from having limited liquidity and wider bid-ask spread. Because of these issues, institutional investors seldom invest in low-float stocks.

Analysts' mean recommendation for Ecopetrol S.A. (EC) stands at 3.40. Rating Scale; where 1.0 rating means Strong Buy, 2.0 rating signify Buy, 3.0 recommendation reveals Hold, 4.0 rating score shows Sell and 5.0 displays Strong Sell signal.

Colombia based company, Ecopetrol S.A. (EC)'s latest closing price distance was -1.30% from the average-price of 200 days while it maintained a distance from the 50 Day Moving Average at 0.39% and -2.61% compared with the 20 Day Moving Average.

The stock price weekly volatility remained at 2.99% while volatility is standing at 2.46% for the month. Volatility refers to the amount of uncertainty or risk about the size of changes in a security's value. A higher volatility means that a security's value can potentially be spread out over a larger range of values. This means that the price of the security can change dramatically over a short time period in either direction. A lower volatility means that a security's value does not fluctuate dramatically, but changes in value at a steady pace over a period of time. Commonly, the higher the volatility, the riskier the security.
