Going forward to year-to-date check then we concluded that it resulted performance is positive with move of 34.57%. The stock showed decline in half yearly performance of -17.84% and maintained strong performance for the year at 7.82%.

Technical Outlook:

Technical analysis is as a method that applies to take a guess of future price trends through analyzing market action. The core idea of technical analysis is that history tends to repeat itself. That is why we can find certain situations in the market that occur regularly. These situations can be discovered by chart analysis and technical indicators, which we can use for our advantage - and that is precisely what technical analysis is trying to do. After keeping Technical check on movement of stock price comparison to its moving averages like 20, 50 and 200 SMA, we detected following trends of EC. These trends are grabbed from latest trading activity. These up or down trends are telling the direction of stock price on basis of moving averages. This analysis is focused on overall picture of trading activity. This presents short term, intermediate and long term technical levels of Ecopetrol S.A. (EC) stock.

Short Term: Bullish Trend

Intermediate Term: upward Trend

Long Term: strong Trend

Technical analysts have little regard for the value of a company. They use historic price data to observe stock price patterns to predict the direction of that price going forward. Analysts use common formulas and ratios to accomplish this. The stock appeared -23.57% downward to its 52-week high and 40.13% above its 52-week low. The stock price surged with Upswing change of 0.71% when it was compared to 20-day moving average. Ecopetrol S.A. (EC) has shown an upward trend during time of recent session. This trend is based on movement of 50 SMA and stock price is rising off the 50 SMA. If we checked progress of the long term moving average 200 SMA, then we noticed uptrend created which can be described as recent trading price is above the 200 SMA level. Latest trading price was 8.16% upbeat to its 50-day moving average and above 1.74% to its 200-day moving average. Ecopetrol S.A. (EC) RSI (Relative Strength Index) is 54.41. RSI is a technical indicator of price momentum, comparing the size of recent gains to the size of recent losses and establishes oversold and overbought positions. The stock has weekly volatility of 2.99% and monthly volatility of 2.62%.

The High Dividend Yield Company on the list is Ecopetrol S.A. (EC) stock.

Dividend Yield: 2.85% - Volume: 1.27 million, Floating Shares: 223.54 million - Average Volume: 0.88 million - Outstanding Shares: 2.18 billion

Some investors are searching for a very profitable stock with high dividend yield. Here is Ecopetrol S.A. (EC) stock which is highly profitable for investors that pay high dividends with Dividend Yield rate of 2.85%. Investors use the dividend yield formula to compute the cash flow they are getting from their investment in stocks. In other words, investors want to know how much dividends they are getting for every dollar that the stock is worth. Tracing annual dividend record of this company we revealed that its High Dividend Yield is giving attention to Dividend Seeking Investors. Some investors are looking for high current income rather than income growth.

According to record of annual dividend yield, this stock can reward an investor a capital gain along with the very rich dividend. A company with a high dividend yield pays its investors a large dividend compared to the fair market value of the stock. This means the investors are getting highly compensated for their investments compared with lower dividend yielding stocks. I recommend readers use this stock as a basis for further research. On its own the dividend yield tells you very little. It's a raw figure that needs interpretation. Experienced investors use dividend yield in many ways when constructing their portfolio.
