Ecopetrol expresses its rejection for the new attack on the Caño Limón-Coveñas pipeline, in the jurisdiction of La Cecilia, municipality of Teorama, in Norte de Santander.

The attack resulted in a rupture of the pipeline and the fall of oil to the Catatumbo river. Due to the attacks that have been registered in the previous months, the permanent control point La Gabarra is active since December 2018. Additionally, another operational control point will be activated in that area.

As part of the contingency plan, the Municipal Council for Risk and Disaster Management of Teorama and the corresponding environmental authorities were notified.

Ecopetrol strongly condemns these illicit actions that put the integrity of people at risk and seriously affect the environment.
