Pre-Post COVID-19 Impact on Global Mazut Market

COVID-19 is an infectious disease caused by the most recently discovered novel corona virus. Largely unknown before the outbreak began in Wuhan (China) in December 2019, COVID-19 has moved from a regional crisis to a global pandemic in just a matter of a few weeks.

In addition, production and supply chain delays were also witnessed during the second quarter which poised a challenge to the Mazut market, since end-user industries were still not operating at their full capacity.
