Emission reduction

This step forward will not only benefit the environment. It also has a positive impact on the automotive industry in Colombia. To the **reduce pollution emissions by 25%**, more efficient emission control systems are expected. Likewise **longer car engines** and high performance.

Since December 2022, **Ecopetrol** has offset the carbon emissions generated since **extraction of crude oil** to deliver more fuel to wholesale distributors.

The above becomes your fuel **first carbon offset fuel in the country**. In addition to **107,000 tons of CO2** offset for now, is equivalent to avoiding emissions from the deforestation of approximately 9,000 hectares of Colombian mangrove forest over three years.

Ecopetrol indicated that it will continue to implement technology initiatives in **Barrancabermeja and Cartagena refineries** to further reduce the sulfur content of fuels.

So, **ensure energy sovereignty** the country's competitiveness and generate resources for energy transition and the decarbonization of its operations.
