BBVA issues Colombia's first social bond in the international market

BBVA was selected as one of the bookrunners for Colombia's first issue of social bonds in the international market. The debt was rated Baa2/BB+/BB+ for its inaugural offering and was denominated in US dollars with a dual-tranche format maturing in 2035 and 2053. 'For BBVA, it is very important to continue supporting Colombian businesses in the search for capital to grow. **Ecopetrol** has been a fundamental client for our bank - not only because it is the largest company in the country, but also due to its proven commitment to transition to cleaner energy. With this operation, BBVA is ratifying its promise to accompany our clients looking for financing options in capital markets. I would like to thank the entire team that made this successful debt issue possible,' said Carlos Alberto Rodriguez, head of CIB at BBVA in Colombia.

The oil company's new debt issue is characterized by the issuance of 12-year debt securities, including the repurchasing of the bonds with a 2025 maturity. The operation began on January 9th with high
