## Colombia's Ecopetrol sets 2026 capex at up to \$7.2bn

Published on 11/30/2025 at 09:05 pm EST

Share

ECOPETROL S.A. +0.80%

Colombia's state-controlled oil producer **Ecopetrol** said it will invest between COP22 trillion and COP27 trillion in 2026, equivalent to \$5.88bn to \$7.21bn, keeping spending broadly in line with the 2025 programme as it emphasised "disciplined" capital allocation across its businesses, *Reuters* reported.

**Ecopetrol** plans to drill 380 to 430 development wells, with about 95% located in Colombia and 5% in the United States. It also expects to drill eight to 10 exploratory wells, mostly in Colombia, as the company maintains its focus on core upstream operations.

The firm forecasts an average output of 730,000 to 740,000 barrels of oil equivalent per day next year. About COP17.2 trillion (\$4.59bn), or roughly 70% of total planned investment, will be directed to sustaining and expanding production, it said.

"This plan maintains investment levels compared with projected 2025 year-end figures, under capital discipline criteria for each business line," **Ecopetrol** said.

The 2026 plan is based on a projected Brent price of \$60 per barrel and an average exchange rate of around COP3,734.47 per US dollar, assumptions the company said reflect a cautious outlook amid uncertain global energy markets.
