

AIQ and [Ecopetrol](#) to Explore Opportunities to Support Colombia's Energy Transition

COMPANY UPDATES POSTED ON JAN 08, 2025

[AIQ](#), an Abu Dhabi-based AI champion developing innovative solutions for the energy sector, has signed a Strategic Collaboration Agreement (SCA) with [Ecopetrol](#), the national oil company of Colombia, to explore the deployment of AIQ's cutting-edge artificial intelligence (AI) solutions in [Ecopetrol](#)'s operations.

Magzhan Kenesbai, Acting Managing Director of AIQ commented, "This is an important agreement for AIQ as it confirms our progress in seeking opportunities to work with customers beyond our base in the UAE. [Ecopetrol](#) is a highly experienced and well-regarded national oil company, which could opt to collaborate with any AI technology provider globally. The fact that we have been selected is a major endorsement of the credibility we have established in just over four years of operation. We look forward to exploring impactful AI solutions we might provide to [Ecopetrol](#), which support the company's operational and strategic goals."

Luis Felipe Rivera, Vice-President of Science, Technology, and Innovation at [Ecopetrol](#) said, "This agreement means strengthening ties with companies and governments that are working hard on AI to accelerate their energy transition strategies, as Colombia is doing through the [Ecopetrol](#) business group."

On [Ecopetrol](#)'s part, investment in leading-edge technology is how the company seeks to lead the energy transition through knowledge, human talent, science, technological capacity, and innovation.

Francisco Goncalves, Head of AIQ Latin America added, "AIQ is an entity which, through big data, analytics and intelligence, is creating significant impact in the energy, and oil and gas sectors, and its reputation is growing internationally."

The SCA will initially be in effect for 24 months, with the possibility of extension through mutual agreement.
