Ecopetrol bids to buy Enel's 205-MW wind project in Colombia - report

Mar 3, 2025, 12:24:48 PM Article by Sladjana Djunic

Colombian state oil company Ecopetrol SA (NYSE:EC) has made a formal offer to acquire the 205-MW Windpeshi wind farm project from Enel Colombia, according to a report in Colombian business newspaper La Republica.

Construction of the Windpeshi wind farm in La Guajira, Colombia. Image source: Enel Colombia (www.enel.com.co)

The project, located in the department of La Guajira, has faced significant delays due to community protests and road blockades, leading Enel to suspend construction in May 2023.

"The operation consists of the transfer of the Windpeshi project by Enel Colombia to Ecopetrol," the oil company said in a statement cited by La Republica.

The acquisition is subject to approval from Colombia's competition regulator.

According to La Republica's report, the Windpeshi project was 64% complete in December. The wind farm is now expected to start operation on September 30, 2026, significantly behind the initial target of November 2021.
